

Biohazards Fire Damaged Structures Meth Labs

FOAMSHIELD™ FOAM IS EFFECTIVE
AGAINST MANY KNOWN BACTERIA &
VIRUSES

STEP 1

Establish the chemical mixture as required:-

- (a) Fire Damaged Structures: FS-HV
- (b) Meth Lab: FS-D164 (check ratio required)
- (c) Biohazards: FS-D164 (check ratio required)

STEP 2

Apply foam to all accessible areas including inside of structure where safe to do so.

STEP 3

Continue to apply foam during demolition. All waste to be treated as hazardous (asbestos/chemical).

STEP 4

In the case of meth labs and biohazards, a second application may be required prior to clean up.

100% biodegradable green technology
